

### **How to view videos**

- Click on “Start here to view free and subscription videos!” This will provide a list of videos which can be viewed for free, and also the library of videos which are available for subscription.
- To play free and subscribed videos, simply tap on your selected video and it will start to play.
- If you have not yet purchased a subscription or if your subscription has expired it will take you to the buy screen to give you the opportunity to subscribe (Any subscription you buy will apply to the whole library).

### **Users with an existing subscription**

- If you have an existing subscription that you purchased on the [LearnersCloud](#) website you will be able to access your videos online through your IOS device, you just need to click “Login”.
- At the login screen, enter your email address and password provided when you first registered on the LearnersCloud website. You can then view these videos until your subscription expires.

### **Transferring your subscriptions to another device**

- When you first purchase a subscription we ask you to supply your email address and password. This is not compulsory but we advise that you do provide these as this is how we will identify you when you need to use your subscription on another IOS device.
- On a new device, you will need to download the app from the app store. Click on “Transfer my subscription”. You will then need to enter your username and password. Upon successful authorisation you can view your subscribed videos.

### **Support on Twitter**

- We recommend that you follow us on twitter to get instant service notifications and also to be the first to find out about our latest service updates and offers.

If you have any problems or need further assistance, simply click “Report Problem” at the “Free and Subscription videos” screen where you can send us an email. Alternatively email us directly at [support@learnerscloud.com](mailto:support@learnerscloud.com).
